

# Surviving Extreme Oil Market Volatility 2008 Seminar

In the last 6 months the cost of crude oil has gone from \$US110 a barrel up to \$US145 and down to \$US75. Yet, in Australia, the average pump price for diesel, in the same time, has gone from \$1.60cpl to \$1.85cpl and back to \$1.62cpl.

How is this possible? How can your organisation take advantage of low prices and manage high prices? What will happen when 10ppm Diesel is introduced in January 2009, and what are your options? Get the answers to these questions at this informative and to-the-point seminar. FUELtrac presents industry experts **John Cowell**, **Craig James**, **Chris Kable** and **Geoff Trotter**.

Utilise the experts to develop your own strategy to survive and prosper in uncertain times.

Key presentation items to be covered by FUELtrac will be;

- How to take advantage of oil company pricing systems
- How to manage risk in your fuel procurement
- What role do alternative fuels , such as CNG, LPG and Biodiesel play

**Where:** Riverview Hotel Kingsford Smith Drive, Newstead

**When:** 4 December 9:30am – 3:30pm

**Cost:** \$385.00 per person ( including GST) which includes lunch and access to all materials presented.

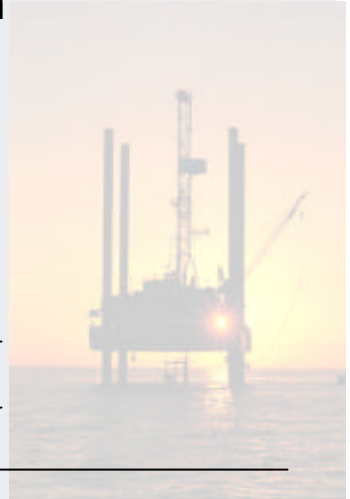

To reserve your seat simply complete the booking form over the page and fax to (07) 3219 4485.
